<https://russelldudek.github.io/KLDiscovery/>

Operator-technologist who turns fragmented, high-consequence work into visible, governed operating products.

Connects Operations, Customer Success, Engineering, quality, data, and AI to reduce handoff friction, surface risk earlier, and build mechanisms people can use. Hands-on with AI workflow design, retrieval and agent patterns, product specifications, prototypes, telemetry, ERP/CRM integration requirements, operating metrics, and frontline adoption.

ROLE-ALIGNED CAPABILITIES

Workflow orchestration	Internal tools & B2B operations software	AI agents / RAG / evaluations	Anomaly & exception design	
Client portals / visibility	API & data-workflow requirements	Operational telemetry	Roadmaps & prioritization	Cross-functional leadership

PROFESSIONAL EXPERIENCE

Vape-Jet

2025-Present

Director of Operations

- Lead an AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows in a software-enabled robotics company.
- Translate operating pain into system requirements, process controls, ownership rules, work queues, instrumentation, and cross-functional priorities connecting factory, field, customer, fleet, and business signals.
- Build decision cadence and escalation mechanisms around quality, customer issues, supplier performance, production readiness, service delivery, and continuous improvement across an installed base of approximately 1,000 fielded robots.
- Work directly with technical and frontline teams to prototype workflows, clarify specifications, improve system adoption, and keep product promises grounded in operational reality.

DudeWorth AI Automation Advisory

2017-Present

Founder / AI and Automation Advisor

- Develop AI readiness, opportunity-selection, workflow, governance, adoption, and value-realization frameworks for operations, logistics, automation, and service environments.
- Design agentic workflow patterns combining structured context, retrieval, LLMs, human judgment, escalation, decision records, evaluation, and governance rails.
- Prototype web-based AI tools, calculators, workflow applications, and operational decision systems using JavaScript/React, Python, SQL, Firebase, cloud services, and APIs.

Amazon

2014-2018

Operations Management / Site Leader

- Launched and operated Prime delivery capabilities in Pittsburgh within a 24/7 environment handling approximately five million second-day orders annually.
- Built customer-backward operating routines for throughput, labor, standard work, escalation, service recovery, and continuous improvement using Lean, Six Sigma, and Gemba methods.
- Contributed operational insight to Amazon Flex geolocation concepts and Prime Air research, translating frontline constraints into customer and delivery mechanisms.

PROFESSIONAL EXPERIENCE CONTINUED

Cardinal Building Products

2021-2023

Regional Director

- Built the first remote regional operation and modernized CRM, commercial, fulfillment, logistics, and digital workflows across distributed teams.
- Connected customer demand, routing, service execution, and operating visibility; developed AI-enhanced transportation and route-planning concepts to improve decision quality.
- Led cross-functional execution and adoption across a new operating model while preserving customer continuity.

Compunetics

2000-2013

Director of Operations and Engineering Management · progressive R&D, production, acquisition, and operations leadership

- Led engineering, manufacturing, quality, customer delivery, and technical program execution in high-reliability electronics environments serving mission-critical and advanced-computing applications.
- Built process controls, quality systems, root-cause routines, standard work, and cross-functional mechanisms spanning technical requirements, production readiness, customer commitments, and corrective action.
- Served as technical liaison across customers and partners including DoD programs, CERN, Intel, AMD, and advanced-material suppliers; published industry articles, delivered technical talks, and contributed to the HyperTransport Consortium.
- Translated complex science and engineering into executable operating requirements, decisions, and delivery plans without separating technical credibility from customer outcomes.

ZeusVu

2018-2022

Chief Pilot / Technology Operations

- Led regulated drone operations with a 100% safety record and no FAA incidents, including chain-of-custody, field data, mapping, customer requirements, and operational risk controls.
- Developed object-detection and aerial-inventory concepts using orthomosaic mapping, ground truth, GPS positioning, and TensorFlow-related approaches.

EDUCATION, CREDENTIALS & TECHNICAL TOOLKIT

Education University of Pittsburgh Bachelor of Science Academic grounding in materials science, physical chemistry, mathematics, genetics, and biological systems. Credentials Google AI Essentials · IBM Enterprise Design Thinking Practitioner · Six Sigma · OSHA 10 · Food Safety Management	AI / data / product LLM workflows · Agentic AI · RAG patterns · Human-in-the-loop systems · Evaluations · Prompt and context design · Python · SQL · JavaScript / React · TensorFlow · Tableau · API requirements · Data and event modeling Enterprise / operations Odoo · Jira · Confluence · HubSpot · Slack · CRM / ERP workflows · Quality systems · Lean / Six Sigma / Gemba · Operational telemetry · Workflow consolidation · Roadmaps · Stakeholder alignment

KLDiscovery CONTRIBUTION PROFILE

Orchestrate Turn recurring handoffs and exceptions into explicit state, ownership, integration, and automation requirements.	Assure Connect telemetry, quality controls, AI detection, evidence, and accountable human release decisions.	Reveal Translate internal operating truth into useful client visibility, status, SLA, lineage, and choice.
